**IMPORTANT:** Before installation, make sure that your door frame is stable and able to bear weight.

- 1 Loosen the Door Pull Up Bar by unscrewing the locking screw and turn the loosened bar until the required length is almost reached.

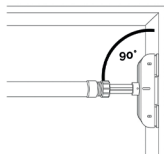

*Note: The ends should be extended equally.*

- 2 Go to your door frame and continue to turn at the Door Pull Up Bar.

- 3 Make sure that the ends are aligned vertically in the door frame. Now turn until the Door Pull Up Bar is firmly attached to the frame.

- 4 Now tighten the locking screw so that the Door Pull Up Bar does not turn on its own.

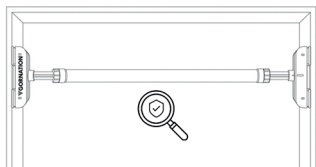

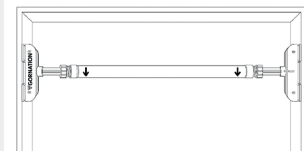

- 5** Check whether the door frame gives way or the Door Pull Up Bar slips. If this is the case, you will need to readjust.

- 6** The stability of the Door Pull Up Bar and the door frame must be checked after installation and before each workout.

- 7** To remove the Door Pull Up Bar, the locking screws must first be loosened before the Door Pull Up Bar can be loosened and removed from the frame.
